Introduction

"Traffic Rider" – the latest version of a racing game that makes you feel astounding. Are you a bike racing game lover who desires to spend the spare time playing online? Then this is the right game for you. What are you waiting for? Download and start playing this game right away.

Thanks to technology that has enabled people to use a different app from any corner across the globe. This app is free; all you need is an android phone and an internet connection.

This game is the advanced version of the traditional games having far better features. You can win immense gold, coins, keys, and other items. By using these rewards, you can upgrade the brand of the bike, color, and engine.

People are amused to know that this game offers more than 25 brands of Harley-Davidson Suzuki and Kawasaki bikes and considers one of the best attributes of this game that no other racing game has offered to date.

You can play this game anywhere, while traveling, sitting in a park, waiting for someone in the café. No internet connection is required. This virtual game will make you feel in a real-time situation.

Features:

- **Perplexing Graphics:** It has amazing graphics that allow the user to play in different weather – sunlight, rain, snowfall. People can drive in cities, highways, through mountains giving you the actual feel. The game has outstanding clarity and gives the player beautiful scenes in mode the day and light modes.
- **Varied Lingo:** It is available in the English language, which is one of the most preferred and known lingos in many countries, but apart from this, it is available in 18 other more languages, not restricting it to some countries. This app has been developed, keeping in mind the target audience, which grants widespread usage.
- **Superb Sound Quality:** Giving you the real-time feel, bike sounds are just great. Have you ever jaunt the bike? No, try it; you will feel as you are driving it yourself. Sound will leave you with no judgment. It sounds like a real one.

- Career Mode: Are you ready to take the challenge? It provides more than 70 missions to complete, which is done level wise. Online leaderboards are another awesome feature that makes it worth playing. Play it and feel the difference.
- First-Person Perspective: The avatar-based application facilitates the player to play hassle-free because there are no obstacles to this perspective. It is designed from the viewpoint of the driver; they can easily adjust the camera view and can play the game smoothly.

Working:

The game is as easy to play as any other game. You can control the game just by a gentle touch on the screen. The right side helps accelerate the bike's speed, while the left is to control the speed and pause. If you want to move right or left, tilt your phone in that direction.

Each level brings new challenges and difficulty levels. You have to upgrade the bike and the engine for better efficiency constantly. For this, you need to earn the required points to unlock the new bike. Here is how to score better:

- You will earn more points if you accelerate the speed of the bike. While crossing the speed of 100km/hr, you will earn cash and bonus points.
- Have you ever driven in the wrong direction? How risky is it? Similarly, you have to take the risk by driving in the opposite direction to earn a better score.
- Over-taking in a two-way street is another way to score well, where there are more chances of banging.
- You have to frequently move in the right or the left direction to avoid hitting, better to keep the bike in the center. Although risky, you can move to the left or right while staying at the center of the road.

The prominent characteristic of this game is that you can review your performance and make it better every time you play.

Alternative

For all those who have a passion for race games - "the racing fever" is another game you can download for free from the Google store. It provides you the option of customization of car design. Having the eccentric graphics gives the user a stunning experience.

It is a multiplayer game in which the player has to face many deep turns and obstacles to win the race. It provides the various options to control and play the game according to the gamer

preference, like steering wheel, joystick, buttons, or gyro.

The gamer can upgrade to the new vehicles by unlocking the keys that can easily be collected during the game or by visiting it every day. The best feature is that the keys start to increase on their own.

Comparison

The traffic rider mod Apk and the racing fever are the racing games that give the user a marvelous experience and have distinctive characteristics and pros and cons.

- The racing fever is a multiplayer game allowing the user to compete with the world's best players, whereas the traffic rider is a single-player game. People can only improve their own score.
- The traffic rider gives you the ample option of bikes brand, color, and engine, whereas the racing fever gives 16 types of models.
- The traffic rider offers the first-person perspective view that is user-friendly, as opposed to the racing fever where the gamer can control the game using the camera view.
- The traffic rider is available in 19 languages while the counterpart is available in 23 different languages.
